### **DETAILED ACTION**

The indicated allowability of claims 1, 21, 23, 25, 27, 29 and 38-40 is withdrawn in view of the newly discovered reference(s) to Charles [US 5,165,162]. Rejections based on the newly cited reference(s) follow.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21, 23, 25, 27, 29 and 38-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Charles.

Regarding claims 29 and 38-40, Charles discloses a magnetic circuit comprising a magnetic layer having a median line and composed of a series of portions [segments 16] separated by walls [gaps 18] of insulating material [column 2, lines 62-64]. Charles is silent as to the wall generating a demagnetizing field, however, it is the position of the examiner that the subject functional language is inherent to the prior art structure as evidenced by the prior art meeting all the claimed structural limitations. Compare figure 4 of applicant's specification and prior art figure 1 and respective portions of the specifications.

Regarding claims 21 and 25, Charles discloses each portion, or segment, of the magnetic circuit being a single layer.

Art Unit: 2832

Regarding claims 23 and 27, Charles discloses the walls being evenly spaced [figure 4].

***Allowable Subject Matter***

Claims 22 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not teach or suggest, in the claimed combination, the magnetic layer being formed by a stack of alternating magnetic and insulating layers.

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lincoln Donovan whose telephone number is 703 308-3111. The examiner can normally be reached on M-F 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Elvin Enad can be reached on (703) 308-7619.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1920.
